5. Adobe Creative Cloud can now be downloaded at "Applikationen"

6. **Attention**: At "Kontoauthentifizierung" you must use your system password and not your password for the Adobe account.

7. After the installation various programs can be installed via the Creative Cloud Desktop.

Attention: Now the licenses are only trial licenses. That's the reason why there's only "Testen" or "Kaufen" written below the software and not "Installieren". The licenses are going to be active after one or two days. For the moment you can install the software with **"Testen"**. The license will be activated automatically in the background.
